

REMARKS/ARGUMENTS

Claims 1-9, 11-16, and 18-25 are pending in this application, while claims 10 and 17 have been canceled. Applicant preserves the right to pursue these and other claims in this and other applications.

An amended FIG. 1 is provided with this Response, in accordance with the Examiner's suggestion (Office Action, pages 2-3). In this amended FIG. 1, the label Prior Art has been added, and the orphan lead lines have been removed.

Regarding the Examiner's objection that the drawings do not show every claimed feature, Applicant makes the following responses. The various roller bearings of claims 3-8 are depicted at least by the inner and outer sleeves 32, 34 and ring 36 shown in FIG. 2A, 3A, 3B, and 4. Regarding claims 19-21, the locking pin, solenoid, and spring-activated switch are contained at least within the projection 46 shown in FIGS. 2A-2B and 3A-3B. Regarding claim 25, the flat belt is shown by the drive belt 42 shown in FIG. 2A.

Regarding the driving pulley (claim 10) and the projection replaced by a recess (claim 17), these claims have been canceled.

Various of the claims have also been amended in accordance with the Examiner's objections (Office Action, page 4), but with two exceptions. The Examiner's objection to claims 22-23 is not understood. Claims 22 and 23 depend from claim 13, which recites a spring in its line 1. Thus, the spring of claim 22 and 23 has its antecedent basis within claim 13. If the

Examiner is objecting to the word 'said' in front of the spring, then claims 22 and 23 have been amended to recite 'the spring' rather than 'said spring'.

The entire application should now be ready for indication of Allowance. The Examiner's prompt acknowledgement is respectfully requested.

Dated: November 9, 2006

Respectfully submitted,

By
